EXECUTIVE SUMMARY

My life as a journalist, writer and editor of more than 20 years, has helped me hone systems thinking, active listening and clear communication skills. In the current age of cloud technology, I am inspired to discover ways to infuse new skills and solutions into my strong base of experience. Every problem has a story, and the solution often lies within. My strength is getting to the heart of every story. Curious, collaborative, and adventurous; I see opportunities, rather than problems. I prefer to ask and listen, rather than show and tell. I like to try out, instead of sit back. Allow me to facilitate impactful conversations that result in collaborative solutions.
